CDS® Unit GPTs - the right choice

The influencing factor in the choice of **gross pollutant trap** for the Blacktown City Council Goroka Street, Whalan site was the flexibility and performance offered by a **CDS® unit**. A CDS® P3024 unit is the largest of six stormwater quality improvement devices recently designed for key locations around the Blacktown local government area.

New powerline boosts Bowen Basin electric coal rail network

The electricity supply to the rail network servicing the coal mining industry in the Bowen Basin has been reinforced with the completion of a new 58km high voltage transmission powerline and substation by Powerlink Queensland as part of QR Network's Bolingbroke Feeder Station project. Rocla supplied approximately 140 spun **concrete poles** for the project.
